

*A. Ephemerides.*

**Ashwell.** 1640.

**A New Almanacke for  
the yeare of our Lord  
Christ, 1640.**

**Being the Bisextile, or Leap-yeare**

Wherein are inserted many things  
of speciall note and necessary use, never  
heretofore written by any : as also a  
plaine and perfect rule to know  
the houre of the night by the  
Moone.

**Calculated for the Towne of Ongar  
in the County of Essex, where the Pole  
is elevated above the horizon  
52 degrites, 23 minuits.**

**Printed at London by Tho. Cotes, for  
the Company of Stationers.**

The common Notes and moveable Feasts, according to the account and computation of the Church of England.

The Dyne or Goldenumber	7
The Circle of the Sunne	13
The Epas	17
Dominicall Letter	E
Roman Indiction	D
The space betweene Chylmas and Shrobesunday, is	8
Shrobesunday	February 16
Easter day	April 5
Ascension day	May 14
Whitsunday	May 24
Advent Sunday	Novemb. 29

To know what of the clocke it is in the night by the Moone.

Looke upon any sun-dyall, and see what of clocke it is by the shadow of the Moone (as you do by the sun) noting how much it wanteth or is past 12 of the clocke: for so much it wanteth or is past the houre of her comming to the South that day.

Example.

Vpon a certaine day I looked in a sun-dyall and found the shadow of the Moone to point at 10 of the clocke, which wanted two houres of 12. the same day. I also found her age 9 dayes, and thereby her comming to the South was at 7. houres and 12 minuits, therefore it wanted two houres of the same: so that it must be 5 of the clocke and 12 minuits past, or if the same day the shadow had beeene at 2 after noone, it had bin 2 houres past 7, and 12 minutes, to wit 9 and 12 min. so of the rest.

A necessary and perfect rule for ever to know  
when the 4. Termes begin and end : and how  
many Returns are in every Term.

1 Hilary Terme beginneth the 23 day of Januari (if  
it be not Sunday) but then the next day after, and endeth  
the 12 or 13 of Februario, and hath 4 Returns.

Octabis Hilarij      }      Craftino Purificationis.  
Quind Hilarij      }      Octabis Purificationis.

2 Easter Terme beginneth 17 dayes after Easter, and  
endeth 4 dayes after Ascension day, and hath 5 Returns.

Quind. Paschæ      }      Mensæ      }      Quind. Paschæ.  
Tres Paschæ      }      Paschæ      }      Craftino Ascensionis

3 Trinity Terme beginneth the next day alwayes af-  
ter Corpus Christi day, and endeth the Wednesday fort-  
night after, & hath 4 Returns. Note that Corpus Christi  
day is alwayes the Thursday after Trinity Sunday.

Craftino Trinitatis      }      Quind. Trinitatis.  
Octabis Trinitatis.      }      Tres Trinitatis.

4 Michaelmas Terme begins the 9 of October (if it  
be not Sunday) and endeth the 28 day of November,  
and hath 8 Returns.

Octabis Michael      }      Craftino Animarum.  
Quind. Michael      }      Craftino Martini  
Tres Michael      }      Octabis Martini  
Mensæ Michael      }      Quind. Martini.

Note that the Exchequer openeth 8 daye: before every Terme be-  
gins, except Trinity Terme, before which it openneth onely 4 dayes.  
The first and last dayes of Appearance, are the first and last dayes of  
the Terme.

Cambridge Commencement falleth ouer the 6 day of July, the Ves-  
pers upon the Saturday next before.

Oxford Aft happeneth upon the 13 day of July, the Vespers upon  
the Saturday immediately before.

A most plain and easie Table shewing the true  
 time of the beginning, continuance, and yeares, since  
 the reigne of each King & Queene in England, from the  
 Conquest, vntill this yeare, 1640, Gathered forth of  
 Chronicles, and set forth for profitable vse of  
 Lawyers, Scriveners, &c.

The Kings names.	Began they reigne.	The time they reigned.	Since they reigne,

# A Declaration of the Disposition of the foure Parts or Quar- ters of this present yeere.

1640.

And first of Winter.

THE WINTER QUARTER according to the motion of the Sunne, began the last yeer the 12 day of December, at whiche time the Sunne having his greatest declination from the equator to the South, and scited in the Tropicall point of Capricorne, bringeth divers impediments, wherewith at other times the Sun being moze neere and moze elevated, doth preserue and cherish the elements, and all things compassed of them.

So as now commeth cold and darknesse to us, on this Northern part of the equator. But the most pleasant and comfortable time of Summer to the inhabitants neere the South Pole, viz. Nova Guinea, chaldis, terra-del, Fivego, &c.

The proper qualities of this quarter (according to natures inclination) is cold and moist, cleane opposite and contrary to the qualitie of Summer quarter, and in this quarter, the inward parts of man are very

hot, and being healthfull may receive plenty  
of food, because naturall heate is now com-  
forted, and is gone inward, and there increa-  
sed, and maketh digestion the better.

The ordinary grieses attending upon the  
cold Quarter, are shottnesse of wind, the col-  
lick, sore eyes, tooth-ach, head-aches ioynt-  
aches, stiches in the side, rheumes,oughes,  
hoarsenesse in the throat, paines in the sta-  
mack, with other infirmities.

Wherfore for to prevent such griefe,  
use meats that warme and dry :  
Both head and feet, see warme thou keep,  
eate well, drinke sparingly.

---

Of the second Part of the yeare called  
the Spring.

**T**H<sup>E</sup> Spring (according to Astronomi-  
call Computation) doth take his begin-  
ning, when the Prince of Light (the Sun)  
doth enter into the first point of Aries, which  
happeneth this present yeare , the 11 of  
March at 6 a clock 30 minuts 50 sec. after  
noone , at which time the artificiall day and  
night are both of one equall length , in all  
parts of the world.

The

The naturall disposition of this quarter  
is hot and moist, resembling the ayre and  
youth of man, and likewise very healthfull,  
and therefore accounted to be the chiefeſt  
time in all the yeare for to take Physick, and  
to give ease to ſuch as be diseaſed, and not  
only to ſuch that feare diseases to breed in  
them, but also for ſuch as haue had long lin-  
gering diseases.

This quarter is moſt conſeſtable of all  
the yeare, yet the ordinary diſeaſes thereof  
are faintings, Plurisſes, giddineſſe of the  
head, Kings evil, ſwellings in the throat, and  
grifes in the ſhoulders and armeſ, cauſed  
by cold, Agues, paines in the ſtomack, Apo-  
tumies, ſore eyes, and ſuch like.

Fresh humours now abouud man in,  
to Bleed and Purge ſpare not thy wealth:  
Let meats be pure, and meales but thin,  
if thou regard thy future health.

---

Of the third Part of the yeare  
called Summer.

Summer is well ſaid to be the nouriſher  
both of man and beaſt and all other crea-  
tures, by providing and bringing forth thoſe

things which are needfull for them. This quarter beginneth at the Suns entrance into the first degræ of Cancer 11. of June, at which time he maketh his greatest declination toward the North, from the Äquinoctiall line, and then is our longest day and shordest night.

This season ( according to his proper nature ) is hot and dry: compared to the element of fire, and complexion of choller, and differeth greatly both from the spring and winter, and also from the harvest season; and is a moze dangerous time then the two former, for the sicknesses hereof are moze desperate, and if they be not deadly, yet their continuance is the longer; mans stomack is now slowest of digestion, because natural heate leaveth the inward parts, and possesseth the outward: Take heed therefore of eating and drinking immoderately, least that you surfeit.

The sicknesses at this time are divers, as burning Agues, Plurisies, violent burning Feavours, Inflammations of the Blood, causing great distemperature in the Head, Braine, Sight and Heart: also in the Keynes, Loynes, Backe and Bladder, with other strange Diseases proceeding from corrupt inflamed Blood: and the same

Ashwell. 1640.

This mans most to molest persons of middle  
age.

Mans stomach now more weaker is  
then earst it was before:  
Let moistning therefore be thy meat,  
eate lesse, but drinke the more.

---

Of the fourth part of the yeare, called Au-  
tumne, Harvest, or the Fall of  
the Leaf.

**A**utumne, or Harvest, commonly called  
the Fall of the Lease (according to our  
English Accomp) beginneth when the Sun  
having finished the Summer quarter in the  
last degree of Virgo, and at his first ingres-  
sion into the first degree of Libra: then makin-  
g againste the dayes and nights of an e-  
quall length unto all Nations: which is on  
the 13 day of September, and lasteth whiles  
that the Sunne maketh his passage through  
these signes, Libra, Scorpio, Sagittarie: and  
finishing the season at the Suns entrance  
into the first scruple of Capricorne, which is  
on the 11 day of December.

The condition of this season (according to  
naturlall inclination) is cold and dry, fitly

Ashwell. 1640.

compared to the earth and melancholy humour: & the Northern Region, being the unholcomest quarter in all the yeare.

The infirmitie incident to this sickly season be many, and dangerous; as wandyng Feavers, quartal Agues, falling Sickness, Wind-Collick, and many other melanchol effects, stuffing at the Breast and Stomack great grieves in the Wacke, Keynes, and Lopnes: from which and from all our deserbed punishments O Lord defend us.

Take heed therefore of cold raw Fruits,  
whose juice corruption breeds:  
This Season serveth fit againe,  
to Purge, to Bath, to Bleed.

---

Short Rules necessary to be considered in letting of Blood, Purging, Bathing,  
and Sweating.

In letting of Blood obserue this, bleed not  
at all, except urgent cause compell thee;  
which is to be knowne by the counsell of the  
learned Physician, the age of the Patient  
ought also to be regarded: for from very  
young or old persons, Blood ought not in  
any case to be taken.

The

The time of the yeare fittell for this purpose, is from the middell of the spring to the beginning of summer: haruest is also indifferenter, the season being temperate.

For Complerion, let blood, the cholericke, when the Moone is in Cancer, Scorpio, or Pisces, in any place except in the brest, members, or feet.

For the Phlegmatick, the Moone in Aries, or Sagittarius, in any part except the head and thighes.

For the Melancholy, the Moone in Libra, or Aquarius, in any place the buttocks and legs excepted.

And for the Sanguine complexion, let blood in any of the former signes; so that it be done with consideration and advice of the skilfull.

Take heed further, that ye let not blood in the extreame heats of summer, or cold of winter; Likewise within two dayes of the change, or full of the Moon, it is not to be done without urgent cause, as the Plurisie, Pestilence, Squinancie, or Apoplexie, or the like extreame diseases: for then you may not stay for a chosen day, least in the meane time the partie diseased be past help.

After blood-letting, abstaine from sleepe and food for the space of sixe houres: also

from

from all exercise that shall too much straine  
the body, soz soure dayes after using meats  
of a light digestion.

Of Purging.

It is very good to Purge when the Moon  
is in Cancer, Scorpion, or Pisces: and indis-  
sident upon extreamitie, Gemini, Libra, or  
Aquarius.

Purge not when the Moone is in any of  
these signes, Aries, Taurus, or Capricorne.

Of Bathing.

The fittest time in the yeare to enter  
Baths, is from the beginning of May, unto  
the end of September, when the Moone is  
in any of these signes Aries, Leo, or Sagittari-  
us, two or three dayes after the change of  
the Moone, or at the full.

Let the Sunne be of a good heighth when  
you enter into the Bath, soz then the misty  
and other corrupt Infections, are drawne  
from the earth.

If you will Bath for cleanlinessse, let the  
Moone have her course in Libra, or Pisces.

Bathe not when the Moone is in these  
cold signes, Taurus, Virgo and Capricorne.

Of Sweating.

For sweating, Let the Moon be in these  
signes; Aries, Leo, Sag. Canc. Scorp. Pis. Note  
further, that it is better to sweat in the even-  
ing then in the morning.

Hus-

Ashwell. 1640.

Husbandly Advertisements; needfull  
to be marked.

**V**hen you would plant or graft, consider wheres the wind standeth: If it be in the South, it is very good for that purpose: but if it be in the North, or in the East, it is not good.

It is good to plant or graft generally, the Moone increasing in these signes, Taurus, or Aquarius, in the beginning of the Spring; or latter end of harvest.

Plant trees for continuance, when the Moone is in Taurus, Leo, or Aquarius.

Cut timber to have it sound, in December or January, in the waine of the Moone, or in Aquarius, or Pisces.

Hewne trees, and pull off the mosse in the moneth of January.

plash hedges, and lop trees for Feswell that the stump may the sooner grow againe, when the Moon is in Aries, or Libra, and in her increase.

Set young quicksets from September to March.

Kemoove young trees in the last quarter of the moonz, when she is in Aries, Libra, Scorpio, and in these moneths, September, November, February.

Set vines in Feby. March, or September, specially

specially the Moone in Arics, Libra, Scorpio  
in her increase.

Set Rose trees in the middest of Februarie, when the Moon increaseth.

Cut or prune trees in March or Aprial  
the Moon in Taurus, Virgo, or Capricorne.

Gather fruit, as Apples, Peares and the  
like, at the full of the Moon, in the after noon  
the weather being faire and dry.

Cut down hay presently after the full of  
the Moone.

Dung ground to prevent the growing of  
weeds, the Moon decreasing.

Sow Carret-seeds about the end of Februarie  
or beginning of March the moon increasing.

Sow Onions and Leekes in February  
or March at the waine of the Moon.

Sow Radish in February, Aprial, or June,  
in the increase of the Moon.

Sow Cowcumbers and Millions in Februarie,  
March, or June, in a hot, and a faire  
day.

Sow Parsely, Fennell, and Annis seed in  
February or March, at the full of the Moon.

Sow Margerum, Violets, Lime, Rose-  
mary, and Lavender, in February, March,  
or Aprial, in the increase of the Moon.

Sow Gilliflowers and Wall-flowers in  
March or Aprial in the old of the Moon.

Sow

Ashwell. 1640.

Show Hysope and Savory in March  
when the Moon is old.

Show double Marygolds in February or  
March in the increase of the Moon.

Sheare sheepe at the increase of the Moon.

The best time to geld Cattle the Moon  
being in Aries, Sagittarius or Capricorne.

---

Brief representation of idle or extraordinary expences, with their amounts to in the  
yeer, fit to be regarded of all those  
that out of a wary disposition  
intend to thrive.

By the Day.

By the weeke.

15 <i>lb</i>

- 2 Shilling 4 pence.  
4 Shillings 8 pence.  
8 Shillings 16 pence.  
18 Shillings 8 pence.  
1 Pound 8 shillings.  
3 Pound 17 shill. 4 pen.  
2 Pound 6 shill. 8 pence.  
2 Pound 16 shillings.  
3 Pound 5 shill. 4 pence.  
3 Pound 14 shill. 8 pen.  
4 Pound 4 shillings.  
4 Pound 13 shill. 4 pen.  
5 Pound 2 shill. 8 pen.  
5 Pound 12 shillings.

~~20 of vire.~~  
This table you may count as you did the  
former, for one farthing a pound, is one shil-  
ling one two pence the halfe hundred, which  
being doubled is two shillings four pence  
the hundred.

Two farthings a pound, is two shillings,  
2 two pence the halfe hundred, which being  
doubled is four shillings eight pence the  
hundred.

Ashwell. 1640.

A penny a pound is foure shillings 4. two pences the halfe hundred, which being doubled, is nine shillings four pence the hundred.

By this Rule you may count all those summes, in the former table; Rememb'ring how many farthings one pound doth cost, soz so many shillings, and so many two pences shall the halfe hundred cost. This is very easie and usefull soz all those that can neither write nor cast a count.

Thus gentle Reader, I have taken paine and care to explaine me selfe with as much brevite as may be, notwithstanding of your favourable admittance of this my labours desiring, if in any part it be faulty, thy favourable correction and construction; If otherwise, thy loving encouragement.
